

SCORECARD for use with booklet and CHOICES WE MAKE program at www.projectworldview.org/choices.htm

Starting on page one of the booklet with choice #1 for the Ace of Diamonds. After reading the two theme descriptions, decide which theme best fits into your own worldview—and how strong your preference is. You'll rank that relative preference by putting scores in the appropriate boxes—the **two scores you assign must add up to 10**. The numbers you can use are 10, 8, 5, 2, and 0. For example, suppose you can't decide whether you prefer the "Evidence-Based" theme #201A or the "Faith..." theme #201B. You should put a 5 in each corresponding scorecard box. On the contrary, after reading choice #2 for the King of Diamonds, maybe you have a very strong preference for theme #101A—so in the box for it you'd put a 10, and a 0 in the box for theme #101B. You'll proceed like this, writing a pair of numbers that add up to 10 in each of the two boxes for all 52 choices as you read through the booklet... There is an important constraint: of the 52 pairs of scores you assign, **only 20 choices can be those where you have a very strong 10, 0 preference. Similarly you are allowed only 20 pairs of scores indicating a strong 8,2 preference. That leaves 12 choices that you'll score 5, 5 to indicate you have no preference or that they are not applicable.** After scoring all 52 choices, count up your "very strong" and "strong" and "no or not applicable" preferences. And adjust scores / reread themes as needed to fit the 20, 20, 12 constraints!
